Outage Reporting: 855.222.3275

Jackson Electric Cooperative is an equal opportunity provider and employer.

NEW SERVICE CHECKLIST

Jackson Electric Cooperative is a consumer-member electric utility committed to delivering affordable, reliable, and safe energy to your home and/or business. The following checklist will help guide you through your new line construction.

Getting Started

The following must be completed and submitted to Jackson Electric Cooperative's office before we can process your new line construction request.

- Membership Application** If you are not an active member of Jackson Electric Cooperative, you must complete the new member application included in this packet or the online webform and fulfill all of the requirements for membership. If your previous membership has been inactive for more than one year, you will need to complete an updated application.
- New Service Request** Complete the New Service Request form included in this packet or the online webform. It's important we know what you will be using for electricity so that your transformer can be properly sized.
- Construction Deposit** All new services will be charged a non-refundable construction deposit of \$250. This deposit must be paid in full before an appointment is scheduled. You may mail your payment, pay at the office, or by telephone or our online payment portal once your membership is established. The deposit will be applied towards any balance due to the Cooperative only if construction is completed within the 24 months following the date of the construction deposit payment.

Easements A Jackson Electric representative will draw up the easement(s), but it is your responsibility to provide us with your legal land description for the document. All easements must be signed by all parties involved with the parcel, such as with joint ownership. The signature(s) must be witnessed by a Jackson Electric representative or a notary. We can witness the signature(s) during your site visit appointment, as long as all required parties are present. If we need to access your neighbor's property to reach your location, we also require a completed, signed, and notarized easement from your neighbor(s). It is your responsibility to contact your neighbor(s) to obtain any additional easements needed for your new construction. The easement will be a minimum of 15 feet from the center of the outside conductor. This document is recorded with the Register of Deeds in your county, and there is a \$75 administrative fee that will be billed to you for each easement recorded.

Submit forms to:

- Mail: N6868 County Road F, Black River Falls, WI
- Email: operations@jackelec.com
- Fax: 715.284.7143
- In-person at Jackson Electric Cooperative or our secure drop box

Appointment with Staking Technician

Once the membership application, new service request form, and construction deposit are submitted to our office and processed, a representative from our office will contact you to schedule an appointment with our staking technician.

- Site Visit** An appointment with our staking technician will take place at your construction site. During this meeting, the staking technician will need to know the location of the following:
 - Meter socket. Main meter and a second meter if participating in the Dual Fuel Program.
 - Transformer. Your transformer will be sized according to your electrical needs as listed on your New Service Request form.
 - Area light.
 - Additional property improvements. If you request that the facilities need to be moved at a later date due to additional construction, you will be charged the full cost of the facility relocation.
- Construction Costs** Accurate construction costs will be calculated after the staking technician has completed the site visit.

Final Steps

If you intend to proceed with your new line construction after your site visit appointment, the items listed below will need to be completed prior to the start of construction:

- Fees** All new service and line construction fees must be paid in full before construction begins.
- Permits** If Jackson Electric Cooperative is required to obtain any state or county permits in reference to your line construction, the permit fees will be paid by the member.
- Electrical Contractor's Affidavit** A signed wiring affidavit must be completed by your electrician. Your electrician must mount the meter socket and run all wires. Uniform Dwelling Code (UDC) inspection must be completed before an electric meter is installed and energized. This form is included in this packet.
- Backfill and Excavating** All backfilling and excavation must be within 4" of final grade before we will install electric wires.
- Locate Private Utilities** Jackson Electric Cooperative will contact Diggers Hotline. It is the responsibility of the member to locate all private utilities not located by Diggers Hotline.

Construction Begins

Once the site visit by our staking technician has taken place and the locate clears, the construction will be scheduled. We make every effort to complete a job as scheduled. However, power outages take precedence over new service construction which may cause a delay in your construction plans.

To accommodate your construction schedule, please allow us adequate time to obtain the needed material and equipment. The sooner we know your project requirements, the better we can meet your service request.

If you plan on having Jackson Electric Cooperative install new electric service on your property after November 1, an additional charge may be applied if the conventional method of electric service installation is not available due to frost.

New Membership and Electric Services Application Form (For Residential Accounts)

N6868 County Road F • Black River Falls, WI 54615 • 715.284.5385 • 800.370.4607 • Fax 715.284.7143

Please complete the entire application below, with your signature(s) on the back, and return to us immediately. In order to protect your identity, each applicant and/or co-applicant's identification will be verified. Please select one of the following options:

- A. Applicant authorizes Jackson Electric Cooperative to obtain an identity verification and security deposit rating report (soft pull Equifax inquiry). If a security deposit is required, the deposit will be automatically applied to your first billing statement. Jackson Electric may agree to waive any deposit decision if you enroll your account in autopay.
- B. Applicant declines OPTION A. Applicant agrees to enroll in autopay. Applicant and co-applicant must submit one form of government-issued photo ID. Should the account become delinquent or have NSF, the account will be removed from autopay, service may be disconnected, and a deposit of \$350 will be applied to your next billing statement.
- C. Applicant declines OPTION A. Applicant agrees to submit a credit reference letter of good standing (at the discretion of Jackson Electric) from Applicant's previous electric utility. Applicant and co-applicant must submit one form of government-issued photo ID.

If the above membership requirements are not met within 7 days of application submission, service may be disconnected until requirements are met. Reconnect fees will apply. (November 1 – April 15, a \$350 deposit will be applied to the billing statement).

Processing fee: By signing the membership application, Applicant agrees to pay the fee of \$15.00.

SECURITY QUESTION:		ANSWER:	

The undersigned (hereinafter called the "Applicant") hereby applies for membership in the Jackson Electric Cooperative (hereinafter called the "Cooperative"). In consideration of the acceptance of this application, the Applicant(s) does further agree with the Cooperative as follows:

1. The Applicant will purchase from the Cooperative all electric energy purchased for use on the Applicant's premise(s) and shall pay therefore, in accordance with, the rate schedule applicable to the class of service used. Production or use of electric energy on such premise(s), regardless of source thereof, by means of facilities which shall be interconnected with Cooperative facilities, shall be subject to appropriate regulations as shall be fixed from time to time by the Cooperative.
2. The Applicant shall grant the Cooperative the right to enter their property for the purpose of installing and maintaining its facilities and the right to cut or trim any trees that might interfere with said construction and operation. Use of an environmentally friendly treatment for brush control will be limited to the right-of-way.
3. The Cooperative will endeavor to furnish continuous service but will not guarantee uninterrupted service.
4. An application for membership of any person who is legally married shall automatically be recorded in joint names of the Applicant and his or her spouse, if any, unless designated by the Applicant in writing. Immediate family members, other than spouses, may also apply in accordance with Jackson Electric Cooperative's Bylaws.
5. The Applicant agrees to comply with and be bound by the Articles of Incorporation, the Bylaws of the Cooperative, and such policies, rules, and regulations as may from time to time be adopted by the Board of Directors.
6. By signing this application, the Applicant gives the Cooperative permission to verify Applicant's identity and agrees to one of the credit check options for purposes of deposit requirements.
7. By signing this application, Applicant is giving express written consent to call the Applicant's listed phone number(s) for Cooperative business purposes. This may include autodialed and prerecorded message calls.
8. By signing this application, Applicant is giving express written consent to provide electronic notification to the Applicant for Cooperative business purposes.
9. The Applicant assumes neither personal liability nor responsibility for any of the debts or liabilities of the Cooperative, and it is expressly understood that under the law, his private property is exempt from execution for any such debts or liabilities.
10. Residential service only: Whenever there is a person in your household whose health or safety may be threatened by an interruption in service because of infirmities of aging, developmental or mental disabilities, the use of life support systems, or like infirmities incurred at any age, or the frailties associated with being very young, please provide the Cooperative with all the details in writing immediately from a licensed physician. The member is responsible for providing an updated statement to the Cooperative annually.
11. In making this application for credit, you warrant that the information contained herein is true and correct and authorize the Cooperative to investigate your credit record. You believe you are financially able to meet any commitments you make, and you agree to pay our charges according to our terms. All charges are due and payable the 24th of the month following the date of the invoice unless otherwise specified. A late fee of \$25 or finance charge of 1.5%, the greater of which, will be charged on all past due invoices. Any past due accounts will be forwarded to a collections agency.
12. As security for any amounts for which Applicant may become indebted to Cooperative for the services to be provided hereunder, the Applicant hereby conveys, grants and pledges to Cooperative a first priority security interest in all of Applicant's right, title and interest in any patronage capital allocated to Applicant on the books and records of Cooperative. Cooperative shall be entitled to exercise its rights under the security interest herein conveyed as provided by the Bylaws and by such policies, rules, and regulations as may from time to time be adopted by the Cooperative. Applicant hereby authorizes Cooperative to file such financing statements or other documentation as may be necessary to perfect this security interest, and Applicant shall cooperate in executing such documents as may be necessary for Cooperative to enforce this security interest.

The acceptance of this application by the Cooperative shall constitute an agreement between the Applicant and the Cooperative. The contract for electric service shall remain in force until cancelled by withdrawal of the Applicant from membership in the Cooperative.

Dual Fuel Program
<p>A dual fuel system is any configuration of at least four (4) kW of electric heat that is installed in combination with a qualified automatic, non-electric backup source of heat. Electric water heaters and cooling systems can also be connected to this program as long as 4 kW of electric heat is installed. To receive a special off-peak rate, these items are metered separately (with a second meter) and are switched off during peak demand periods via a load management receiver installed by Jackson Electric. There is a monthly facility charge for the second meter. Usage on this meter will be billed at Rate Schedule A9-T until all load control wiring is complete. New ground source heat pump (geothermal) installs are not allowed on the program.</p> <p><input type="checkbox"/> I am interested in the dual fuel program.</p> <p><input type="checkbox"/> I am not interested in this program.</p>

The following charges will be used to determine an "Estimated Bill". All work orders are managed on an individual basis. Additional charges or refunds may occur and will be billed or refunded when the work order is complete. Prices are subject to change without notice.

Deposit:	\$250 (new construction)
----------	--------------------------

Construction Charges		
	Fixed Fee	Includes hardware for both overhead and underground installation
0' - 150'	\$500	\$14.00 per foot construction charge
151' - 500'	\$500	\$9.50 per foot construction charge
501' & over	\$500	\$8.00 per foot construction charge
Administration Fee	\$75	
County Permit Fee	\$50	
Relocate Existing Service	\$500	\$15.00 per foot construction charge
Other Construction Charges: (may or may not be applied, all are in addition to per foot charges above)		
Road Bores	\$650	In addition to above construction charges
Primary Pedestal	\$2,000	In addition to above construction charges
Wetlands & Terrain		Actual cost
Temporary Service Charge	\$175	Member or electrician provided
Temporary Service Charge	\$250	JEC owned and provided
Add Primary Pole	\$1,200	In addition to above construction charges
Frost Charges	20%	If staked after November 15
Late Season Install Charge		Anything after (Date TBD) will be actual material cost and labor

Area Light Installation Charges		
Deliver & Set Yard Pole	\$750	\$1,000 for complete LED area light
Install Area Light Wire	\$1/foot	\$3/foot URD
Install Area Light	\$325	On existing pole, no wire needed
Area Light Only	\$275	Includes photocell, fixture, and bulb
If a separate transformer is required for area light, the charge will be the actual material cost and labor plus \$12.00/month		

Area Light Charge	
LED Area Light	\$12.00/light/month

Other	
Dual Meter Socket	\$350 plus tax
Contactor/Socket Extender	No charge
Production Meter, Meter Install, System Commissioning	\$ 750 plus tax (systems not installed by JacksonSolar LLC)

Jackson Electric Cooperative will retain ownership of all facilities needed to provide electric service. The member agrees to pay monthly the charge in effect for the type of lighting installed. Special lighting arrangements may require specific lighting agreements. The monthly rate will be added to the regular energy bill of the member and shall constitute a part of such bill. Jackson Electric Cooperative will install an area lighting fixture. Jackson Electric Cooperative shall replace bulb and repair all damages to the fixture at its own expense, **except when damage to the bulb or fixture is caused by vandalism or malicious destruction, in which case the member shall be responsible for the cost of repairing such damage.**

A Facility Charge will begin as soon as construction is complete, and a transformer is installed.

I have read the above and agree with these charges.

JACKSON ELECTRIC COOPERATIVE • N6868 County Road F • Black River Falls, WI 54615
715.284.5385 • 800.370.4607

Jackson Electric Cooperative is an equal opportunity provider and employer.

Wisconsin Administrative Code

Safety and Professional Services:

SPS 316.950 Connection of electric service. The company or utility furnishing electric current shall obtain proof that electrical wiring complies with this chapter before furnishing the service, as follows:

(1) CERTIFICATE REQUIRED. The electrical wiring required to be inspected under s. SPS 316.940 (2) (a) may not be connected for use until a certificate is filed with the company or utility furnishing electric current. The certified inspector authorized to perform the inspection shall complete and file the certificate with the company or utility.

(2) STATEMENT REQUIRED. Electrical wiring not requiring a certificate under sub. (1) may not be connected for use until a written statement is filed with the company or utility furnishing electric current indicating that the electrical wiring complies with this chapter. The electrical contractor or other person doing the wiring shall complete and file the written statement with the company or utility.

Public Service Commission:

PSC 114.003 Authority and statutory references.

(2) COMPLIANCE WITH ELECTRIC CODE.

(a) A utility must obtain proof of compliance with Volumes 1 and 2 of the Wisconsin State Electrical Code before energizing service. Proof of such compliance shall consist of a certificate furnished by a municipal or other recognized inspection department or officer, or if there is no such inspection department or officer it shall consist of a written statement furnished by the contractor or other person doing the wiring, indicating that there has been such compliance.

(b) A utility shall comply with Volume 1, Wisconsin State Electrical Code when providing electric service.

Wisconsin State Statute

101.875 Inspections.

(1) All inspections of electrical wiring shall be performed by inspectors certified by the department.

(2) Any rule promulgated under s. 101.82 (2m) may not require the inspection of any of the installation, repair, or maintenance of electrical wiring within an existing industrial facility or an existing manufacturing facility unless the plan for the installation, repair, or maintenance is required to be examined under s. 101.12 (2) by the department or by a municipality that has its examinations accepted by the department under s. 101.12 (3) (a), (am), or (b).

101.88 Compliance and penalties.

(1) Every person installing, repairing, or maintaining electrical wiring shall use materials, methods, and equipment that are in conformance with the rules promulgated by the department under this subchapter.

(3) Any person who violates this subchapter or any rule promulgated under this subchapter shall forfeit to the state not less than \$25 nor more than \$500 for each violation. Each day of violation constitutes a separate offense.

Dual Fuel Program

What is the dual fuel program?

The dual fuel program is a voluntary program in which members who participate receive a reduced rate for qualifying electric heating and cooling systems that are wired for peak load control. Members who participate have two meters or “dual meters.” One meter records typical household items like lights, appliances, and electronics. The second “dual fuel meter” records the usage of your qualifying electric heating loads.

To qualify for this program, you must install 4 kW of electric heating that is wired to be interrupted via a load management receiver during peak demand times. Most forms of electric heating, such as electric boilers, air source heat pumps, ETS units, and baseboards are permitted on the dual fuel meter. An automatic, non-electric (fossil fuel) backup source of heat is required for this program to maintain heat during a control period. **Geothermal heat pumps are not allowed on the dual fuel program.**

If your location has qualifying electric heating loads, your electric water heater and cooling system can also be wired to this meter. No other loads are allowed on this meter. **Heat pump water heaters are not eligible for this program.**

Double meter sockets are available for purchase from Jackson Electric Cooperative. **It is the member’s responsibility to contact Jackson Electric Cooperative to have the dual fuel load management receiver installed** after all the wiring to the meter socket is complete.

If you have any intentions in participating in this program, the setup is much easier to complete during the new construction process. It may be expensive to install at a later date.

Rebates are Available

Jackson Electric Cooperative offers rebates for qualified heat pumps and water heaters, along with other energy efficient items. Go to www.jackelec.com to learn more.

Electric Heating Options

Air Source Heat Pump (250% Efficient) Rebate Available

An air source heat pump transfers heat between your house and the outside air. It can deliver more heat energy than the electric energy it consumes, therefore making it economical and efficient to operate. During the summer months, the air source heat pump cools your home like an air conditioner; in the winter months, it provides heat.

Geothermal Heat Pump (400% Efficient) Rebate Available

The highest efficiency heating and cooling system available, as it uses the earth's constant temperature to heat and cool your home. Geothermal heat pumps can meet nearly all of your home's heating and cooling requirements year-round.

Electric Boiler (100% Efficient)

These systems heat your home by heating water that circulates through tubing installed in the floor or in hot water baseboard heaters. Supplemental heating and whole house heating are possible with electric boilers.

Electric Thermal Storage (ETS) (100% Efficient)

This technology allows specially designed bricks stored inside a cabinet to heat with electricity during off peak hours when energy rates are lowest. When the thermostat calls for heat, the stored heat in the bricks is distributed throughout the house. This system can be combined with an air source heat pump for greater efficiency. Room units are also available.

Electric Water Heating Options

Standard Electric Water Heater Rebate Available for 75-gallons or greater

Delivers the safest, simplest and most convenient way to heat water. With a storage tank water heater, the water is kept hot and ready for use at all times in an insulated storage tank. You may purchase a 100-gallon water heater from Jackson Electric Cooperative.

Heat Pump Water Heater Rebate Available

These water heaters are more efficient than electric resistance water heaters, as they transfer heat energy from the surrounding air to the water in the storage tank.

REBATE PROGRAMS

Rebate forms are available at www.jackelec.com or from our office.

- Rebates are not to exceed the equipment cost.
- New equipment must be purchased, installed, and operating (generating kWhs) in 2024.
- Active Jackson Electric Cooperative memberships only.
- Installed new equipment must be on Jackson Electric Cooperative's lines.
- New equipment is subject to verification by a Jackson Electric representative.
- Rebates are in place through December 31, 2024, or until funds are depleted.
- Availability of rebates is subject to change without notice.
- Required documentation must be submitted within 60 days of invoice date or no later than December 31, 2024, whichever comes first.
- Rebate amounts less than \$500 will be applied as a credit to your billing statement.
- Application may be rejected if all required documentation is not completed and submitted.

APPLIANCES

All appliances must be Energy Star rated. To receive your rebate, complete and submit to our office the rebate form, along with a copy of your receipt or invoice of each item purchased, and the Energy Star label.

Clothes washer.....	\$150
Clothes dryer (must be electric).....	\$150
Dishwasher.....	\$150
Dehumidifier.....	\$50
Refrigerator (min. of 10 cubic feet).....	\$150
Freezer (min. of 10 cubic feet).....	\$150
Inductive Range.....	\$150

HEAT PUMPS

To receive your rebate, complete and submit to our office the rebate form, a copy of your receipt or paid invoice, the AHRI certificate, and documentation showing the equipment is installed and operating on Jackson Electric Cooperative's service lines.

Air source heat pump.....	\$500/ton (SEER2 14.3+, HSPF2 7.5+ or SEER 15+, HSPF 8.8+)
Geothermal heat pump.....	\$500/ton (New units not allowed on Jackson Electric's load management program)
Variable speed blower motor.....	\$35/unit (New furnace only. Eae ≤ 670 kwh/yr or variable speed (not multi-speed))

WATER HEATERS

Electric water heater: Load management receiver must be installed to receive rebate. Must meet the Uniform Energy Factor .88+ to qualify for the rebate. Heat pump water heater: integrated (all-in-one) units must meet the Uniform Energy Factor 2.00+. Cannot be installed on the dual fuel meter or connected to load management program.

75-99 gallon water heater.....	\$150
100+ gallon water heater.....	\$300
Heat pump water heater.....	\$300

LIGHTING

To receive a rebate, complete and submit to our office the rebate form, along with a copy of your receipt or invoice of each item purchased. LED fixture requests must show documentation of the lumens per fixture.

RESIDENTIAL (lighting for the home)

LED bulb.....	\$0.50/bulb (Qty less than 5 bulbs does not qualify)
LED Fixture.....	\$0.50/800 lumens
Occupancy Sensor.....	\$5.00
LED Exit Sign.....	\$5.00

Custom rebates may be available. Contact our office for more information.

COMMERCIAL & INDUSTRIAL

Agricultural, commercial and industrial members who install certain types of energy saving equipment and/or incorporate energy efficiency measures may qualify for custom rebates. Qualifications do apply. Please contact our office or refer to the rebate form for details.

Exhaust fan.....	\$1/inch
Circulation fan.....	\$1/inch
Dairy plate cooler/well water pre-cooler....	\$500/unit
Dairy refrigeration heat recovery w/ electric backup.....	\$300/unit (Used with controlled electric water heater)
Low/zero energy livestock waterer.....	\$50/unit (500 watts or less, insulated tank)
Scroll refrigerant compressor.....	\$30/HP
Variable frequency drive.....	\$30/HP

ELECTRIC VEHICLE CHARGER

Must be controlled by the cooperative's energy management program. Charger must be purchased from Jackson Electric.

Smart Electric Vehicle Charging Station.....	\$800 (Used with integrated metering)
--	--

AUDIT RECOMMENDED IMPROVEMENTS

- Home or farm improved must be on Jackson Electric service lines.
- Energy efficiency improvements must be recommendations from an audit arranged by Jackson Electric Cooperative or a cooperative approved partner. Please contact Jackson Electric for auditor verification.
- Rebate not to exceed the cost of energy efficiency improvements up to \$500. Cost can include material and professional labor. The cost of the audit cannot be included.
- Audit must be a comprehensive audit including a written report.
- Audit report must indicate the improvement will result in electrical or delivered fossil fuels reduction or efficiency.
- If another rebate is available, the audit recommended improvement will qualify for only that rebate. For example, if an auditor recommends purchasing an Energy Star refrigerator, the refrigerator will qualify for our Appliance rebate, not the Audit Recommended Improvements rebate.
- Each member account qualifies for only one of this incentive every five years, regardless of the number of audits performed and regardless of the number of measures implemented.
- Contact our office for more details on qualifications for this rebate.

Custom rebates may be available. Contact our office for more information.
